Herman Athor Galabuzi, Front-end Developer

I'm a recent graduate from HackYourFuture Denmark with a strong desire to learn and grow as a Junior Full-Stack Developer. I've got 8 months of hands-on experience in web development, and I'm particularly passionate about crafting web applications. I've had the opportunity to contribute to development projects using Scrum and Agile methodologies, where I've honed my skills in ideation, design, coding, and software deployment, solving practical business problems along the way. My commitment lies in staying updated with industry trends and emerging technologies, and I'm eager to embrace and adapt to the latest innovations as I embark on my career journey in web development.

HTML	CSS	Javascript	Reactjs	Nodejs	Nextjs	Git
Teamwork		Leadership	Professionalism		Good communicator	

EXPERIENCE

2018 - 2020

Fruitful Learning, Project Manager/ Organization Manager
I was responsible for for overseeing and coordinating various aspects of the organization to ensure it runs efficiently and achieve its goals. it involved Making reports to my managers, being part of decision making, facilitate a efficient communication within the organization, staff management and supervision

2021 - 2022

W-P Gront AB, Packaging Team Member |
I worked closely with my team to get products ready for selling. My main job was to make sure the products were packed right, had the correct labels, and were set for delivery. I also checked if the products were good quality and ran the packaging machines. Teamwork, safety, and time management were really important in this job

EDUCATION

2023
