ABOUT

I'm a frontend developer and a proud father of a wonderful son, I relocated to Europe at the start of spring in 2021. With experience in frontend web technologies, I am a firm believer in the mobile-first, dynamic pages and easy-to-use approach. I define myself as a practical person in every field of my life, always trying to find ways to solve problems as fast and easily as possible. I'm always looking to improve my knowledge, logical thinking, coding skills, and development tools and use my past experience to face the different challenges that may appear along the way.
My favorite quote is "Never stop learning" as I believe that's the only way to constantly stay competitive and expand the range of my possibilities

EXPERIENCE

Personal Skill Improvement, Denmark — *FrontEnd Developer*

JAN 2023 - PRESENT

- I am proficient in HTML, CSS, and JavaScript.
- I have experience with modern front-end frameworks such as React, Nextjs, and Tailwindcss.
- I am familiar with version control systems like Git and relevant workflows.
- I have knowledge of responsive design and mobile-first development practices.
- I created a personal portfolio website, showcasing a collection of front-end projects and demonstrating design and coding capabilities.
- I identified and resolved cross-browser compatibility issues in a complex web application, ensuring seamless functionality across different platforms.
- I implemented efficient debugging strategies to troubleshoot and fix critical issues, improving overall site performance and user experience.
- I adapted to evolving project requirements and integrated new tools and libraries like clerkjs, firebase and more Javascript libraries to enhance development efficiency and maintain quality standards.
- I proactively stayed updated with the latest front-end technologies and trends through online courses, tutorials, and industry-related articles.

W-P Grönt, Sweden —Packaging Team Member

JULY 2021 - MAY 2022

- I collaborated closely with a team to prepare products for sale.
- I ensured correct packaging, labeling, and preparation for the delivery of products.
- I conducted quality checks on products to maintain high standards.
- I operated packaging machines to streamline production processes.
- I prioritized teamwork, safety, and efficient time management in daily operations.

SKILLS

HTML. CSS. Javascript. React. Nodejs. Nextjs. Git. Database. MongoDB. Teamwork. Professionalism. Attention to detail. Good communicator. Adoptable. Continuous Learner. Problem-Solving. Time Management.

LANGUAGES

English	Proficient
Danish	Beginner
Luganda	Native

EDUCATION

Diploma In Computer Science

YMCA Comprehensive Institute

01/2019 – 02/2020

High School Certificate

Taibah International School

2013 - 2017

Fruitful Learning, Uganda — *Project Manager/Organisation Manager*

SEPT 2018 - JAN 2020

- – I prepared and presented comprehensive reports to management.
- – I actively participated in decision-making processes.
- – I facilitated efficient communication within the organization.
- – I managed and supervised five staff members to ensure smooth functioning.

PROJECTS

HAGmax — *HBOmax Clone* [*Source Code*](#)

- – This project was influenced by HBOmax, and I created it to provide a user with the opportunity to view the most recent movies and watch show trailers. I built it using a dynamic blend of Next.js, a React framework, in conjunction with the TMDB movie API for comprehensive content integration. I enhanced the visual aspect using a combination of Tailwind CS, Chakra UI, and a bit of Material UI.

    Through this project, I gained expertise in handling API responses and segregating server-side components. I also developed reusable components that can be utilized across various sections of the website. Additionally, I gained hands-on experience in resolving CORS issues that emerged during server requests and so many more experiences that I would be more than happy to contribute to your team.

AthorStore — *E-Commerce Store* [*Source Code*](#)

- – This E-commerce store is a user-friendly web application that offers a seamless shopping experience. Built with Next.js, I efficiently fetched product data from a free and open-source store API, ensuring swift and dynamic content updates. Leveraging the power of Tailwind CSS, I prioritized a sleek and responsive design, enhancing the overall user interface. This web app allows users to effortlessly search, explore, and browse through an array of high-quality products, providing an intuitive and engaging shopping journey.

NotesApp — *Notes making App* [*Source Code*](#)

- – NotesApp is a user-friendly notes-taking web application that I am building with a fully functional front-end and backend CRUD operations. This web app is built with the power of tools like Next.js, Material UI with Tailwindcss for the visuals and the flexibility of the NoSQL database MongoDB. I have also added security measures with user authentication provided by the clerk library

    I've created the app to allow users save and edit notes. Though this application was intended for learning purposes I plan to make it a fully functional receipe app(so stay in touch for updates.)I have acquired quite valuable skills such as linking a frontend application

to a backend and establishing connections with databases, along with querying NoSQL databases. Additionally, I have learned to incorporate security measures, enabling user authentication and managing account operations facilitated by clerk. I have also become proficient in creating secure servers and API endpoints, ensuring they are shielded from unauthorized requests. And ofcourse i got better at fixing unexpected bugs and alot more skills that could be valuable to your team.
